6 Way CT shorting Assembly

This is a 6 pole Current Transformer shorting Terminal block assembly. All Meter and CT connections can be safely terminated with the help of captive nuts in the terminals. A central shorting current bar is pre-installed and CT shorting screws can be connected in the respective points to short the secondary of CTs for measurement and calibration of meters. The entire assembly is IP20 shock resistant and standard K series marking tags can be installed for clear circuit identification.
